

ask anyone who knows™

Gear Up For Outdoors Ltd. has been an authorized dealer of Canada Goose Parkas for over 15 years! We are one of six authorized Canadian on-line dealers with a dedicated staff of 8 that co-ordinate the website & the shipping of your Canada Goose Parka. Take a look at www.gear-up.com. We have the largest collection of styles and colours available on line and in our store... TAKE YOUR PICK.

We have seen the move from the European market over the last couple of years to North America. The Brand Name and the Fashion component of these jackets has driven the sales of these jackets to the point that the

original intended user; a bush pilot in Nunavut or a Musher on the Artic Circle has had a hard time getting their mitts on this product! Due to this demand, Gear Up pre-orders our inventory line-up a year in advance.

Gear Up has helped facilitate getting jackets for Expeditions as well as outfitting movie sets; X-man, The Day After Tomorrow, National Treasure...

For more than 50 years, Canada Goose has been producing authentic extreme weather gear born of purpose and function, designed for those who need the confidence that come from quality. Beginning with a modest line of

jackets and woolen shirts created in a small warehouse in Toronto. Canada Goose today has grown to be recognized internationally as the leading manufacturer of extreme weather outerwear in the world. They've kept production at home in Canada because they believe that no one can do it better - but the products enjoy a truly global reach. Canada Goose is equally at home in the weather research stations of the frigid South Pole as it is on the windswept Iditarod dog sledding trial in Alaska, on movie sets in remote locations around the world, and in the most exclusive high-fashion centers. Wherever people need protection from the elements, top quality and iconic style, you'll find Canada Goose.
